

# How does today's agency do more with less in an environment of budget cuts and increased constituent expectations?

Automation is the answer

Technology is the tool

Experience makes it work...

## **All the Power You Need, Without all of the Headaches**

NexTec Group solutions help you reduce the time and effort for key accounting tasks as well as providing easy analysis of integrated, updated information, and connecting smoothly with operations across your department or agency. Rich capabilities include all the financial activities that move through state and local government — from general ledger to fixed asset and grant management. Deep integration means that whether you're measuring expenses against revenues, processing transactions, or managing capital expenditures, you can rest assured that financial information is flowing smoothly across your agency.

## **Leverage your Existing Technology Investment**

NexTec Group solutions are easy to control, easy to automate, and easy to integrate into your existing financial management system. Best of all, it works directly with the Microsoft Productivity Tools you and your staff already know, reducing training and implementation time, eliminating redundant tasks and improving the efficiency of your workers.

## **Survive Your Annual Audit, Comply with Sarbanes-Oxley Legislation**

Auditor is a great tool for managing and tracking change. With Auditor's internal controls, you can track what is necessary to help comply with ever-growing complexities of government regulations. And by utilizing the reporting power of Smartlist, Auditor easily reports exactly what you want to know.

## **Sized for Your Agency**

Whether you're a smaller department with simple budgets and grants or a larger agency with complex budgets, multiple projects and advanced reporting needs, NexTec Group solutions can be customized and scaled for your agency. Our solutions allow more time to be spent on other tasks by streamlining administration functions, including:

- Fund Management and Reporting
- Billing
- Payroll and Human Resources
- Encumbrances Tracking
- Grant Management
- Assets and Inventory Control
- Core Financials

These solutions provide detailed, up-to-the-minute financial reports that allow employees to make informed purchasing decisions, while complying with GASB 34 reporting requirements.

## **Full Suite of Citizen Services Modules**

The Nation's population continues to grow and so too do citizens' needs for services from local government agencies. Cities, counties and other local authorities face a multitude of expanding responsibilities. Citizen Service departments extend to a variety of areas, including community development offices, utilities and clerks' offices.

Available modules include: Property Taxation, Utility Billing, Law Enforcement, Business Licensing, Pet Licensing, Cemetery Management, Permitting as well as Centralized Cash Receipting which brings you single-entry, multiple application data, including walk-up Point of Sale capability, and much, much more! Data entry becomes accurate and efficient.

## **Simplify Purchasing, Encumbrance Management and AP Workflow**

Ensure that every expense is tracked and budget limits are not exceeded. Integrated tools let you proactively manage and adhere to budgets, streamline period-end reporting processes, and monitor encumbrances from any point in time.

Gain the flexibility you need to manage budget commitments without halting purchase order processes. With a NexTec Group Solution, you can take advantage of online capabilities for tracking and managing commitments against purchase order requisitions.

## **Accurate Fund Accounting and Simple, Effective Grant Management**

Transferring balances across accounts can be time consuming and error-prone. NexTec Group solutions eliminate manual entry and reconciliation processes, ensuring easy management of interfund transfers and assuring that account balances stay accurate and up-to-date.

Accurately track grant costs, improve accountability, and meet specific guidelines and regulations. Our solutions help ensure budget integrity for every dollar spent, and help you achieve the successful project outcomes.
