

Sage ERP X3 with EDI Toolkit

THE PATH TO HIGH QUALITY, EFFICIENT OPERATIONS

With NexTec Group's Electronic Data Interchange (EDI) Toolkit for Sage ERP X3, you will gain the ability to seamlessly integrate with your suppliers and customers, significantly reducing your lead times, inventory levels and manual processing errors.

The Sage ERP X3 EDI Toolkit solution supports interaction directly with trading partners via FTP/AS2 and other data transport methods as well as via a Value Added Network (VAN). NexTec Group's EDI Toolkit currently supports integration with the following VANs: SPS commerce, DI Central, The Camry Group, and True Commerce.

Additional functionality allows file-based remittance and 820 Payment Processing & Cash Application Matching, which drastically reduces the time required to match and clear large payments with many invoices and deductions.

REDUCE COSTS, INCREASE ACCURACY

Our EDI Toolkit provides the process-specific functionality of a traditional EDI system using the Sage ERP X3 Toolkit, including:

- Exchanging business data (e.g. purchase orders, invoices) electronically with your trading partners.
- Integrating seamlessly with and providing transparent insight into your ERP system (e.g. Sage ERP X3).
- Eliminating manual data entry and data processing tasks (e.g. order & invoice processing).
- Utilizing electronic documents to reduce lead times and speed up payment processes.
- Receiving early notification of upcoming orders to adjust production & inventory accordingly.

Beyond the EDI basics, our diverse toolkit can also help you with trade partner collaboration, customizable data transport processes, data exchange encryption, automated payment order processing and cash application matching.

CORE TRANSLATION AND MAPPING FUNCTIONALITY

The difficulty in interacting programmatically with your trading partners stems from linking together divergent data in a stable, repeatable and manageable way.

The core of the NexTec EDI Toolkit for Sage ERP X3 is a number of applications that allow:

- Simple configuration of data transport and default maps to one or many multiple networks and trading partners.
- Configuration of customer transactional maps direct or VAN with the ability to specify standard toolkit or modified specific processes and import maps.
- Configuration of customer cross reference data such as Units of Measure, SKUs, UPCs and Freight Methods.

INTERFACES TO VALUE ADDED NETWORKS

Collaborate and communicate effectively with your supply chain to establish reliable, long-term business relationship that help you win more sales. Ultimately, the health and performance of your supply chain can contribute directly to revenue growth and profit increase. The VAN integration into our EDI Toolkit also offers:

- Total Compliance Management
- Point-of-Sale Collaboration
- Automated Order/Invoice Processing
- Trade Partner Collaboration
- More Accurate Forecasting
- Advance Shipping Notification

About NexTec Group

NexTec Group has an army of Food & Beverage Manufacturing and Distribution experts with an arsenal of resources that span from coast-to-coast, with offices in New Jersey, New York, Cleveland, Columbus, Houston, Southern California and the Pacific Northwest.

We take a value-oriented, practical approach to delivering IT solutions that have a direct impact on your operations and bottom line. NexTec Group has developed an excellent track record of defining and matching realistic timelines, expectations and budgets that our customers can trust and rely on.

DIRECT PARTNER INTEGRATION

Transporting your data securely to trade partners is no longer a concern with our EDI Toolkit integration. Integrating directly into your Sage ERP X3 system means one less transmission through another interface, eliminating a potential weak point in your secure data transportation chain. Through one-on-one customization, NexTec Group can configure specific trading partners to your EDI Toolkit, including set-up parameters to determine document delivery. Our EDI Toolkit gives you more with:

- Digital Certification & Encryption
- Sender & Receiver Data Exchange
- Detailed Transaction Reporting
- Network Monitoring Services
- Data Back Up & Recovery
- Inspection & Authentication

820 DOCUMENT PROCESSING & CASH APPLICATION MATCHING

Direct integration with Sage ERP X3 provides direct transmission of the 820 documents to your accounting system to simplify your cash receipts process. More importantly, our Cash Application Matching integration means the Sage ERP X3 EDI Toolkit can automatically process your 820 documents, no manual payment or deduction mapping to invoices required. Our 820 Document Processing/Cash Application Matching integration into the EDI Toolkit helps to:

- Auto Process Documents/Data
- Increase A/R Accuracy
- Create Matching Rules
- Automate Deduction Coding
- Reduce Document Routing
- Automatically Extract Data

This robust application can support a set Excel format, CSV format and text format as well as being able to parse and apply the Amazon eCommerce Remittance format all in a single platform.
